

«AGRO TECHNOLOGY TRANSFER AND COMMERCIALIZATION CENTER» LLP

IDEAS IN ACTION

Astana 2017

- Mission facilitating the growth of agricultural productivity in Kazakhstan by identifying needs for new technologies and effectively supporting the transfer and localization of necessary technologies in Kazakhstan.
- ➤ **Goal** is to promote advanced technologies, products and know-how in the agro industrial complex of Kazakhstan through the promotion of cooperation between foreign and domestic entrepreneurs, developers and investors.

Objectives:

- Organization of transfer processes and commercialization of advanced technologies;
- Attraction of investments and assistance in the implementation of investment projects;
- Assistance in the development of high-tech (innovative) business in the agro-industrial complex and processing industry;
- Promoting the development of interaction between domestic agrarian science and the real production sector;
- Assistance in the localization of production of agricultural machinery, equipment for food and processing industries.

Republic of Kazakhstan

- ✓ Member of the World Trade Organization (WTO);
- ✓ Member of the Eurasian Economic Union (EEU together with Russia, Belarus, Kyrgyzstan and Armenia (population 180 million people);
- ✓ The 9th largest country in the world;
- ✓ The 2nd largest country among the CIS countries;
- ✓ Population 17.7 million people.

- ✓ Second place in the world for arable land per capita;
- ✓ Kazakhstan is one of the major exporters of grain and flour;
- ✓ The large number of people living in rural areas 43%, a high proportion of employed 20% of the employed population;
- ✓ Large potential demand for food products markets in the CIS and Central Asia;
- ✓ Constant growth of the gross product in the agro industrial complex;
- ✓ High potential for production and export of organic products.

Attraction of investments in the Agro Industrial Complex

The Center is the operator of technology transfer and attraction of investments in the agroindustrial complex of the Republic of Kazakhstan.

In order to achieve the objectives set, the Center conducts the following activities:

- Search for innovative technologies for potential introduction in agrarian and industrial complex RK;
- Conducts analysis and assessment of the investment potential of the agro-industrial complex in the context of regions;
- Conducts work on attraction of investments and stimulation of investment activity in agro-industrial complex of RK;
- Conducts work on full or partial support and implementation of innovative investment projects;
- Organizes interaction of investors with central and regional state bodies, financial institutions, industrial enterprises and scientific centers;
- Forms a database of potential investors and a database of investment projects.

At present, agriculture is one of the priority directions of the development of the economy of the Republic of Kazakhstan and the State implements a number of Programs for the development of the agro-industrial complex.

Foreign technology transfer

Identification of problem points in agro-industrial complex technologies and introduction of recommendations to state programs:

- analysis of industries in order to identify problem points of their development;
- identifies the main priority areas of development of industries in conjunction with the research institutes and industry associations.

The search for prospective innovative technologies:

- searches for promising technologies in accordance with selected development priorities;
- together with research institutes and industry associations conducts analysis and selection of the most optimal proposals.

Recommendations for technological equipment:

- forms the base of recommended technologies for Agricultural producer and processing enterprises with the provision of open access on the site.

Promote the implementation of projects:

- accompanying the conclusion of supply contracts with the supplier;
- accompanying during the application for funding of the Financial Support Fund, Agrarian Credit Corporation, etc.;
- searching for partners for the implementation of projects and investors.

Scheme of cooperation

- 1. Under the agreements signed with suppliers and manufacturers (hereinafter Partner), AEECC conducts technology assessment and provides the most optimal solutions in the recommended technology base.
- 2. After the request of Agricultural producers, ATTCC provides contacts of the partners and full information about the proposed equipment and technology.
- 3. The partner, in accordance with the concluded agreement, presents a corporate discount to agricultural producers and forms a commercial offer.
- 4. Further, ATTCC facilitates the conclusion of contracts and formation of applications to financial institutions.
